Summary

Full Stack Web Developer and IT Professional with hands-on experience building production web applications, information systems, and providing technical support in a hospital setting. Developed and deployed the PBMCI Integrated Church Management System serving 40+ active users. Currently working as IT Staff at the City of Ilagan Medical Center, managing systems, infrastructure, and technical support across hospital departments.

Education

Saint Ferdinand College

Ilagan, Isabela • 2023 – 2026

Bachelor of Science in Information Technology

Experience

City of Ilagan Medical Center (CIMC)

IT staff

Ilagan, Isabela

May 2026 - Present

- Provide technical support across hospital departments — resolving system access issues, account management, and network connectivity problems
- Manage user accounts including creation, assignment, and ward-level access configuration
- Maintain and repair hardware including PCs, printers, and monitors — performing formatting, OS reinstallation, and activation
- Install and configure LAN cabling, network equipment, and workstation setups
- Troubleshoot and maintain WiFi connectivity across hospital facilities
- Set up and configure workstations, monitors, and peripheral devices for new and existing staff

City Disaster Risk Reduction Management Office (CDRRMO)

On-the-Job Trainee — System Developer

Ilagan, Isabela

Jan - May 2026

- Designed and developed a Dispatch and Incident System to digitize emergency response monitoring
- Implemented automated reporting features for real-time data generation during operations
- Assisted in IoT device deployment and system stability maintenance
- Collaborated with Research and Planning staff to gather requirements and translate them into technical solutions

Projects

PBMCI Integrated Church Management System

2026-2026

- Full stack web system for the Philippine Bible Methodist Church — Jabez Conference, Ilagan, Isabela
- Reduced certificate processing time from 2–3 weeks to under 20 minutes
- Built public multi-step request portal with live certificate preview and unique tracking IDs
- Implemented role-based access control for administrators, secretaries, and pastors

- Serves 40+ active congregation members with zero duplicate certificates since launch

Developer Portfolio Website

2026

- Production-grade developer portfolio with premium animations and responsive design
 - Built with Next.js, TypeScript, Tailwind CSS, and Framer Motion
 - Deployed on Vercel with code splitting, lazy loading, and performance optimization
- <https://portfolio-mocha-six-38.vercel.app>
